BSEB Intermediate   *2017-2019*

PROJECTS

- **Personal Portfolio Website,** I Created a personal portfolio website with **JavaScript, CSS, and HTML,** featuring responsiveness, helps me to learn web development, making websites that work well on different devices. It improves my coding skills, especially in JavaScript, and allows me to make interactive web pages. This project also helps me showcase my skills in a creative and technical way, demonstrating my abilities to potential employers.
  September 2023
- **Weather Forecast,** I've developed a weather forecast web application using **JavaScript, HTML, CSS, and Tailwind CSS.** This project not only provides users with real-time weather data but has also significantly contributed to my skill set in web development and API integration. The experience gained from building this app has strengthened my ability to create responsive and visually appealing web applications while effectively integrating external data sources.
  October 2023
- **E-Commerce,** Developed an e-commerce platform with **React.js,** elevating the user experience through personalized product recommendations, a responsive chatbot for customer support, and an efficient real-time inventory management system, demonstrating advanced React skills and innovative features.
- **E-Learning,** Designed an e-learning platform with **React.js,** utilizing JavaScript for interactive lessons, user authentication, and course tracking. Tailwind CSS and HTML/CSS ensured a polished, responsive UI, enhancing the online learning experience.
